

NBHPCA NEWS

JUNE 2024

A quarterly newsletter brought to you by the New Brunswick Hospice Palliative Care Association

Quarterly Newsletter

Welcome to the first edition of the NBHPCA newsletter! This newsletter is in keeping with our commitment to keep our membership informed about our associations initiatives, events and related progress.

We will publish the newsletter on a quarterly basis after each of our Board meetings in June, September and January.

Save the Date for an Exciting Learning Opportunity

As part of its commitment to providing palliative care education to as many people/communities as possible, the NBHPCA will once again be hosting an October education day. This event will be held on October 18, 2024 simultaneously in two communities in the province. The French session will tentatively take place in Shediac, NB and the English session will be in Sackville, NB. You'll be able to find more details related to registration and the agenda on the NBHPCA website as the date draws closer. This educational opportunity is free for members of the NBHPCA and \$35.00 for non-members.

LEAP News

Learning Essential Approaches to Palliative Care (LEAP) education provides foundational knowledge to health care providers to enhance their knowledge and ability to provide palliative care across all settings. The New Brunswick Department of Health is offering fully funded palliative care education through Pallium Canada as part of its strategy to increase the capacity for palliative care across the province. This education is in alignment with Palliative Care in New Brunswick: A person-centered care and integrated services framework. If you are interested in attending an upcoming session of LEAP, please complete the Expression of interest form [here](#).

NBHPCA Website Construction

The NBHPCA cares about bringing accurate up-to-date information to its members. As such we are taking the time to enhance and improve our website. Please be patient as we work through the current website and make additions, updates and enhancements in an effort to create the best user experience possible!
